

W 130 S3

## TECHNICAL SPECIFICATIONS

### NOT FOLDABLE

- Class of calculation H1B4
- Lifting moment = 95883 lbf·ft
- Hydraulic outreach = 30,5 ft
- First arm with hydraulic extension
- Jib with two hydraulic extensions with integrated fluid transmission system inside jib
- Proportional flow control
- Top seat laterally mounted controls with two additional functions at the jib extension
- Stabilizers with hydraulic rotation 180°, extension and descent
- Stabilizers ground bilateral controls
- Ground hoisting control
- Crane rotation 425° with double rack
- Construction to Machinery Directives 2006/42/CE+UNI EN 12.999
- Basic crane weight\*: 5996 lb
- *The weight is indicative and referred to the basic crane without options or accessories, equipments (grab, clamp, glass handling device) protection carters and ancillary*

### OPTIONS

- Stabilizers with pantograph descent
- Proportional electro-hydraulic flow control with SCANRECO radio control
- Lateral top seat control with joystick and pedals
- Man standing platform with crane operative restricted area
- Glass container handling device
- Oil cooling system
- Top seat access ladder
- Working lights (top seat and jib light)
- Hour counter
- Dry seat foldable shelter
